

BABY MONSTERS

SERENITY

0-36kg
GROUP 0+ . I . II . III

ISOFIX

Specifications:

60/80 x 44 x 50 cm
(height x width x depth)
GROUP 0+ / 1 : rearward
GROUP 1/2/3 : forward facing

Multi-group car seat with Isofix anchoring system, 360° rotation and reclined position at 145°.

ECE R44/04 - Group 0+ / 1/2/3
Birth - approx. 12 years old

Serenity is a car seat certified for **rearward use from birth and up to 18 kg** (approx. 4 years old). It is **the safest way to travel**.

It can also be used forward facing from 9 kg to 18 kg in GROUP I, as it is established in the R44/04 regulation (we do not recommend this position until the weight is over 18 kg or approximately 4 years old).

A child restraint system suitable from birth up to approximately 36 kg / 12 years old. It can be used forward facing from 9 kg up to 36 kg in GROUP I.II. Comfortable for kids and parents.

High comfort for the child

- 4 recline positions both backward and forward facing.
- Removable and height adjustable headrest. Plenty of space for the legs in reverse gear.
- Comfortable, fleece and soft reducer that envelops and grows with the baby thanks to its removable parts.

Removable fabric

The car seat padding, harness guards and headrest are easy to remove for machine washing. It is not necessary to disassemble the harness system.

The reducer also allows for the removal of its elements to facilitate washing.

Security & Installation System

It incorporates an isofix system for its comfortable, safe and fast installation.

- Isofix of self-extraction thanks to its push mechanism installed in the Isofix connector.
- Third Top Tether anchor point that prevents the car seat from tipping forward in case of impact.
- Adjustable 5-point harness to the height of the baby.
- Strong plastic structure. Total protection against impacts lateral.

Our high-back seats protect the child in two ways: the device housing provides protection from head to hips, especially in the case of a side impact; the padded headrest provides safety and comfort for the child's head and neck.

Total protection against side impacts

360° rotation

It can be rotated 360° to face or backwards, without having to reinstall it.
 It also rotates 90° to both sides to position and fasten the child more safely and comfortably from the open car door.
 This seat can be rotated 360° in any reclining position without removing the child.
 360° rotation through its push mechanism installed in the front of the car with quick access.

Suitable from birth

TITAN, thanks to its 145° recline, can be used from birth as the baby's head is in perfect position.
 Thanks to its evolutionary reducer for newborns it allows a perfect adjustment of the baby.

TOP TETHER

Security:

Features Top Tether and Isofix anchoring system for provide the highest security level.

Rotation:

Rotating seat 360° that allows access and position the child in the safety ass with him least effort.

Recline:

Reclined 145°, so that can be used from the birth since the baby's head remains in perfect position.
